

WEATHERPROOF OUTDOOR ARENAS

TOTAL COVERAGE IN UNDER 5 MINUTES

GUARANTEED YEAR-ROUND PROTECTION

 **arenasaver**<sup>®</sup>  
saving sports worldwide

# If rain, snow or ice brings your manage to a close, then you need ArenaSaver ...

**1**  
ArenaSaver, when fully deployed, protects ground from bad weather conditions.

**2**  
ArenaSaver easily rolls-up in less than 5 minutes.

**3**  
ArenaSaver stores neatly in readiness for more bad weather.

## With ArenaSaver you can cover your outdoor manege in under 5 minutes, ensuring protection against adverse weather conditions ...

Until now, bad weather has forced equestrian centres to temporarily close their doors. A frozen or waterlogged arena can prove dangerous to both horse and rider, and is made worse by activity in such conditions. But now, a revolutionary new product is radically changing this situation for the better.

ArenaSaver has been specifically designed to offer permanent low-cost protection for outdoor riding surfaces, without needing to build a costly roof or obtain planning permission. Stored discreetly and neatly on-site, ArenaSaver is rolled-out with minimal effort to guarantee full surface protection in rapid time.

**An average riding school can be completely protected in less than 5 minutes.**

**Order ArenaSaver today and guarantee that your school is kept open for business ... permanently!**
